LASER HYGIENE STANDARD PROFICIENCY COURSE – 6 CE Credits

The Diode laser has become the most commonly utilized laser in dentistry today. Diode lasers have many advantages over traditional surgical and therapeutic techniques including less pain, faster healing and new applications including bleaching and desensitizing teeth. Come learn how to expand the scope of services offered when a laser is added to the practice!

HIGHEST STANDARD OF CARE

Give your patients the newest and highest standard of care! When our course and hands on simulated certification process is complete, we will have instilled the confidence necessary for each hygienist or doctor to know that they are now qualified to provide each patient with the best standard of care while at the same time increasing revenues for your office.

OPTIMIZE REVENUE

We will show each client how to possibly increase their hygiene production on average by \$38,000 a year via a small investment in a laser!

THE EDUCATIONAL OBJECTIVES

1. History of laser and basic laser Physics
2. Laser Components and delivery system
3. Laser safety protocols and hazards
4. (LSO) Laser Safety Officer Responsibilities
5. Laser Procedures and treatment parameters for Perio
