LASER STANDARD PROFICIENCY COURSE – 13 CE Credits (2 parts)

The Diode laser has become the most commonly utilized laser in dentistry today. Diode lasers have many advantages over traditional surgical and therapeutic techniques including less pain, faster healing and new applications including whitening and desensitizing teeth. Come learn how to expand the scope of services offered when a laser is added to the practice while giving your patients the highest standard of care!

OPTIMIZE REVENUE

We will show each client how to possibly increase their hygiene production on average by \$40,000 a year via a small investment in a laser!
